KHUMBUDZO BRANDAN RAMARU

Cloud & DevOps Engineer — AWS | Terraform | Serverless

ramarukb@gmail.com · +27 68 567 4755 · Gauteng, South Africa linkedin.com/in/ramarukb · github.com/MrDoItRight

SUMMARY

AWS-certified cloud engineer with ~2 years of hands-on experience provisioning infrastructure as code and automating deployments on AWS. Built modular Terraform for multi-tier networks and an event-driven security auto-remediation pipeline, and migrated production websites to serverless architectures. AWS Solutions Architect – Associate. Comfortable across VPC networking, IAM, Lambda, and Python automation, and quick to pick up new tooling and ship.

SKILLS

Cloud & IaC: AWS (Lambda, S3, API Gateway, EC2, VPC, IAM, CloudWatch, CloudTrail, EventBridge, SNS, Bedrock), Terraform (modular IaC), Docker & Docker Compose, GitHub Actions (CI/CD), Cloudflare/DNS, SSL/TLS **Automation & Scripting:** Python (Boto3), Bash, deployment automation **Security:** least-privilege IAM, security groups, vulnerability remediation, Microsoft Defender, Burp Suite **Systems:** Linux, Windows Server, Microsoft 365, networking (VPC, subnets, VPN, Wi-Fi) **Data:** MySQL (schema design, ACID, stored procedures), Pandas, Power BI

EXPERIENCE

Cloud Engineer (Internship) — Rekisa · Dec 2025 – Present

- Migrated 2–3 low-traffic company websites from a managed hosting platform (Emergent) to a serverless AWS architecture (Lambda, S3, API Gateway), cutting monthly hosting cost from about $10 to under $2.
- Own cloud architecture, environment provisioning, and backend logic for the company's AI application platform.
- Configured CloudWatch metrics, logs, and alarms across development and staging environments, and administered least-privilege IAM roles and policies for platform access.
- Wrote Python and Bash automation for repeatable deployments and AWS resource management, replacing manual console steps.
- Built custom middleware integrating the Yoco payment gateway with an Ecwid (Lightspeed) storefront, adding a lower-cost checkout option.
- Built and open-sourced a tool-using AI agent on AWS Bedrock AgentCore (Strands, RAG via Bedrock Knowledge Base, DynamoDB, least-privilege IAM).

Founder & Technical Lead — GenSage · Jul 2025 – Dec 2025

- Founded a pre-revenue cloud and automation venture; architected and hosted web applications end to end, configuring DNS records, SSL/TLS certificates, and database connectivity.
- Paused the venture to avoid a conflict of interest on starting the Rekisa internship.

Cybersecurity Analyst (SETA Learnership) — Hemmersbach · Oct 2024 – Sep 2025

- Ran endpoint security scans with Microsoft Defender and applied remediation patches across company and client-site systems.
- Performed authorized penetration testing against a purpose-built training login application using Burp Suite and Hydra; analysed network traffic with Wireshark.

IT Technician Assistant (Work Integrated Learning) — XTrader, Johannesburg · Sep – Nov 2023

- Imaged, diagnosed, and deployed 10+ user workstations; supported office LAN, VPN, backups, and end-user onboarding.

PROJECTS

- **Serverless S3 Auto-Remediation Pipeline** (Terraform, Python) — event-driven DevSecOps engine using CloudTrail, EventBridge, Lambda (Boto3), and SNS to detect and automatically revert public S3 bucket misconfigurations. github.com/MrDoItRight/aws-s3-auto-remediation-terraform
- **AWS Multi-AZ Three-Tier Network** (Terraform) — highly available VPC with public ingress, isolated private subnets, NAT gateways, and least-privilege security groups. github.com/MrDoItRight/aws-three-tier-network-terraform
- **Warehouse Operations Agent** (AWS Bedrock AgentCore, Python) — tool-using AI agent with Bedrock Knowledge Base retrieval, DynamoDB state, and least-privilege IAM, deployed to AgentCore Runtime. github.com/MrDoItRight/bedrock-agentcore-warehouse-agent

CERTIFICATIONS

AWS Certified Solutions Architect – Associate · AWS Certified AI Practitioner · AWS Certified Cloud Practitioner · CompTIA A+
Professional Certificates: Microsoft Power BI Data Analyst (Coursera) · Google Cybersecurity (Coursera)

EDUCATION

BSc Information Technology (NQF 7) — Richfield Graduate Institute of Technology · 2024
