KHUMBUDZO BRANDAN RAMARU

Cloud Engineer — AWS | AI & Serverless

ramarukb@gmail.com · +27 68 567 4755 · Gauteng, South Africa linkedin.com/in/ramarukb · github.com/MrDoItRight

SUMMARY

AWS-certified cloud engineer with ~2 years of hands-on experience building serverless applications and AI-driven tools on AWS. Migrated production websites to serverless architectures, built a live payment-gateway integration for an e-commerce storefront, and prototyped agentic AI applications including a retrieval-augmented generation (RAG) agent on Claude. Holds AWS Solutions Architect – Associate and AWS AI Practitioner. Fast learner who ships working software and reasons about cloud cost and security from first principles.

SKILLS

AI & Agents: AWS Bedrock, Bedrock AgentCore, Strands Agents, tool-using/agentic AI, retrieval-augmented generation (RAG) via Bedrock Knowledge Base, Claude on Bedrock, DynamoDB **Cloud & IaC:** AWS (Lambda, S3, API Gateway, EC2, VPC, IAM, CloudWatch, CloudTrail, EventBridge, SNS), Terraform, Docker & Docker Compose, GitHub Actions (CI/CD), Cloudflare/DNS **Automation & Security:** Python (Boto3), Bash, least-privilege IAM, deployment automation, vulnerability remediation **Systems:** Linux, Windows Server, Microsoft 365, networking (VPC, subnets, VPN) **Data:** MySQL (schema design, ACID, stored procedures), Pandas, Power BI

EXPERIENCE

Cloud Engineer (Internship) — Rekisa · Dec 2025 – Present

- Built and open-sourced a tool-using AI agent on AWS Bedrock AgentCore (Strands Agents, RAG via Bedrock Knowledge Base, DynamoDB state, least-privilege IAM); also prototyping an AI-assisted website builder (in development).
- Migrated 2–3 low-traffic company websites from a managed hosting platform (Emergent) to a serverless AWS architecture (Lambda, S3, API Gateway), cutting monthly hosting cost from about $10 to under $2.
- Built custom middleware integrating the Yoco payment gateway with an Ecwid (Lightspeed) storefront, giving the business a second checkout option at a lower processing rate than its incumbent provider.
- Own cloud architecture, environment provisioning, and backend logic for the company's AI application platform.
- Configured CloudWatch metrics, logs, and alarms across development and staging environments, and administered least-privilege IAM roles and policies.
- Wrote Python and Bash automation for repeatable deployments and AWS resource management, replacing manual console steps.

Founder & Technical Lead — GenSage · Jul 2025 – Dec 2025

- Founded a pre-revenue cloud and automation venture; architected and hosted web applications end to end, configuring DNS records, SSL/TLS certificates, and database connectivity.
- Paused the venture to avoid a conflict of interest on starting the Rekisa internship.

Cybersecurity Analyst (SETA Learnership) — Hemmersbach · Oct 2024 – Sep 2025

- Ran endpoint security scans with Microsoft Defender and applied remediation patches across company and client-site systems.
- Performed authorized penetration testing against a purpose-built training login application, using Burp Suite and Hydra to demonstrate credential-based access weaknesses.

IT Technician Assistant (Work Integrated Learning) — XTrader, Johannesburg · Sep – Nov 2023

- Imaged, diagnosed, and deployed 10+ user workstations; supported office LAN, VPN, and end-user onboarding.

PROJECTS

- **Warehouse Operations Agent** (AWS Bedrock AgentCore, Strands, Python) — tool-using AI agent combining live DynamoDB state with policy-document retrieval (Bedrock Knowledge Base), deployed to AgentCore Runtime with least-privilege IAM and full architecture docs. github.com/MrDoItRight/bedrock-agentcore-warehouse-agent
- **Serverless S3 Auto-Remediation Pipeline** (Terraform, Python) — event-driven DevSecOps engine using CloudTrail, EventBridge, Lambda (Boto3), and SNS to detect and automatically revert public S3 bucket misconfigurations. github.com/MrDoItRight/aws-s3-auto-remediation-terraform
- **AWS Multi-AZ Three-Tier Network** (Terraform) — highly available VPC with public ingress, isolated private subnets, NAT gateways, and least-privilege security groups. github.com/MrDoItRight/aws-three-tier-network-terraform

CERTIFICATIONS

AWS Certified Solutions Architect – Associate · AWS Certified AI Practitioner · AWS Certified Cloud Practitioner · CompTIA A+
Professional Certificates: Microsoft Power BI Data Analyst (Coursera) · Google Cybersecurity (Coursera)

EDUCATION

BSc Information Technology (NQF 7) — Richfield Graduate Institute of Technology · 2024
